I build engaging experiences for my audience with pixel-perfect and performant applications. With a creative approach to development, I add intuitiveness and life to my work. I have worked as a software engineer for a brand design agency for over a year, delivering a design platform for enterprises to generate and manage brand assets on large scale. Developed 2 web apps, 1 marketing website, and a mobile application for iOS and Android as part of my academic projects. I take my role beyond the title of a developer to provide out-of-the-box ideas and manage team balance dynamics through strong interpersonal skills.

## Work Experience

**Software Engineer** | Outlined.co | *Bangalore, India*

Full Time | Sept 2019 - Oct 2020

- Developed and maintained the company's product marketing website and flagship design platform using FabricJS and Laravel.
- Built a PDF to HTML canvas converter using JavaScript and Shell Scripting to import and export designs on the browser.
- Implemented API Integration for data storage, social media interaction, text sentimental analysis, and stock image services.

## Academic Project

**Sift** | Full-Stack Developer | Sept 2021 - Dec 2021

- Sift is a mobile application that lets users scan objects with the camera to learn how and where they can recycle them.
- Developed the marketing website using SASS and ES6 Javascript, compiled using Webpack to build a lightweight and scalable website, making use of GSAP to handle the complex animations.
- Built a major component of the main project application, using React Native to build the mobile app for both iOS and Android.
- Used Shell Scripting to scrape data, and created high-speed APIs for the app, using NodeJS and GraphQL.

## Education

**PG Diploma in Web Development and Design**

Langara College | *Vancouver, Canada*

Sept 2020 - Dec 2021

**Bachelor's Degree in Information Technology**

Manipal University Jaipur | *Jaipur, India*

Aug 2015 - July 2019
